

# Upgates Integration

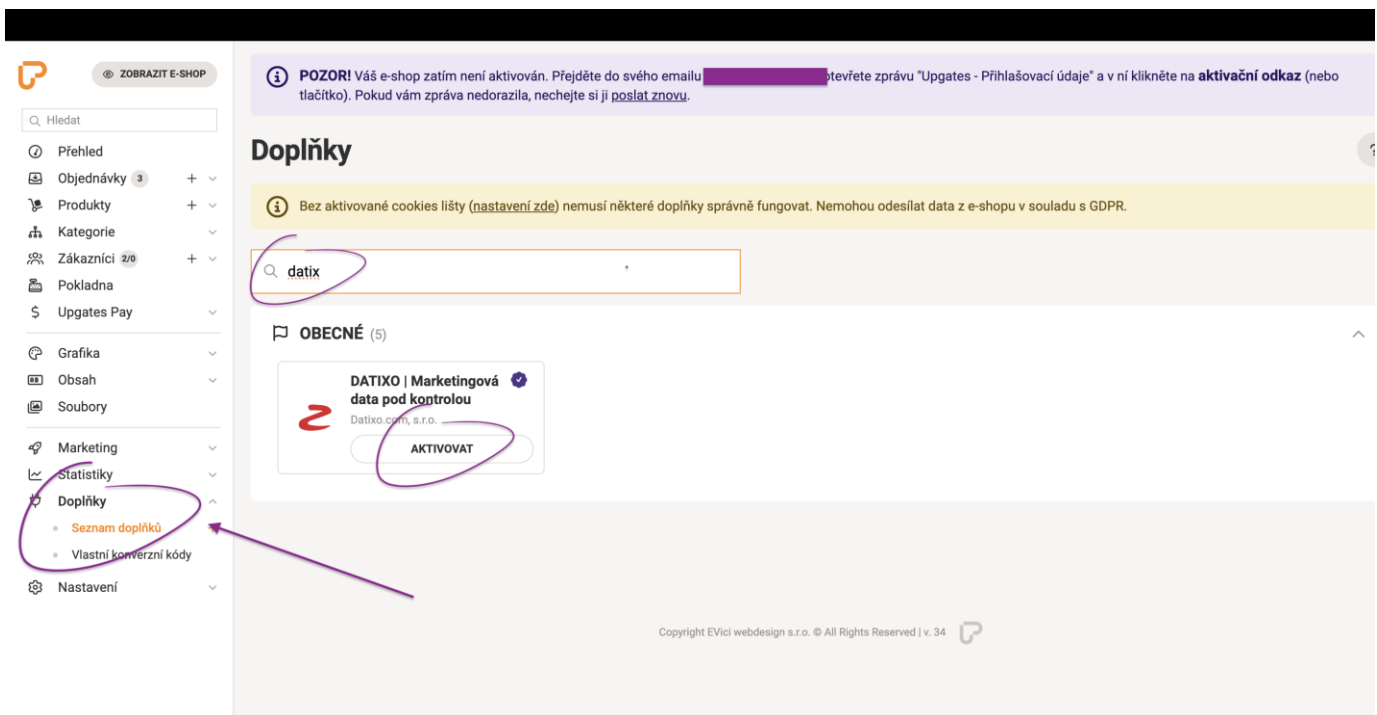

## Requirements

- Access to the uGates admin panel with plugin permissions.
- A live e-shop on a production domain (not in test mode).

No special hardware requirements are needed; a standard web browser suffices.

## Plugin Installation

1. Log in to your e-shop administration.
2. In the left menu, click **Plugins** and select **Plugin List**.
3. Search for **DATIXO** in the search field and activate the plugin.

## Connecting uGates E-shop to DATIXO Application

After activation, you will be redirected to a page where the DATIXO application requires you to select an existing project or create a new one. If you don't have a project in DATIXO yet, create it.

## Verify uGates and DATIXO Connection

After successfully creating the project, we recommend checking if DATIXO is connected to your e-shop on the uGates platform. Automatically after connection, DATIXO starts synchronizing order information and displaying data in reports.

***Note: Loading and rendering data may take several minutes, depending on e-shop size and order volume.***

Integrace třetích stran

Pro párování objednávek s reklamními kampaněmi je klíčové správné nastavení UTM parametrů.

## Choose Your Subscription

After project creation and connection, you have an active free plan, which you can change in Settings > Subscription.

## Get Reporting That Shows Real Profit

Extract maximum value from your data and select a suitable subscription based on the number of integrations. The paid plan provides up-to-date, recalculated data every hour.
